1.1 BACKGROUND & CONTEXT

Nigeria stands at a defining moment. With ongoing macro-economic reforms, a youthful population of over 70% under 35, and rapid digital adoption across key sectors, the opportunity to reposition the nation for global competitiveness has never been greater.

Yet challenges persist: capital flight, structural skills gap, infrastructure deficits, and the critical need for absolute policy clarity. The **Nigerian Leadership Business Summit 2026** builds directly on the success of the 2025 edition ('Leadership Beyond the Norm'). This year, we move decisively from dialogue to deals — by unlocking the three critical levers for national prosperity: **CAPITAL, TALENT, and TECHNOLOGY**.
